

24th November, 2010

To friends of EARL

I am Clare Aseka, had my first surgery in 2003 when I was in class five at Ichinga Primary School. This really changed my life. It is now 2010 and I have and I have done my high school exam.

The best thing is that you are so good and still very ready and willing to support children with disabilities especially through the set surgery. You make them feel encouraged to cope up with life and very much accepted in the society.

It was also my privilege when the EARL asked me to take more children for surgery. I felt inspired and ready to also assist the disabled in society in any way I can. They were five children in number. Their parents also felt happy to have me in the team to encourage and counsel them.

This programme is very good as it makes many people to realise that disability is not inability and that if given chance and also if supported, the disabled can work very hard to promote their lives and improve their ability day by day.

After surgery, you also still ensure that the children are supplied with shoes every now and then just like for my case. I have received many new pairs of shoes and this was quite generous of you. I feel encouraged and keep in mind my decision to emulate you and also be able to support the disabled in society.

Asante sana. Merry Christmas and happy new year.

EA
